angle was $\pi/6$ radians.

Do not do

$S = (\text{theta})(\text{radius})$

because they gave the radius just to confuse you. To convert $\pi/6$ to radians, multiply by $180/\pi$ and get 30 degrees. The (x,y) values are $(\cos x, \sin x)$. $\cos 30$ is $(\sqrt{3})/2$ and $\sin 30$ is $1/2$. However, the radius is two so multiply each value by 2.
