The appearance of the second edition of CGI Programming with Perl heralds the beginning of the neoclassical era of Web service. CGI--or common gateway interface--is the original back end for client-driven, dynamic Web-page service and deserves consideration as the Romulus of the Internet Empire.

Cgi Programming with Perl: Guelich, Scott, Gundavaram ...

In Perl, CGI (Common Gateway Interface) is a protocol for executing scripts via web requests. It is a set of rules and standards that define how the information is exchanged between the web server and custom scripts. Earlier, scripting languages like Perl were used for writing the CGI applications. And, CGI code called by HTTP server was referred to as the CGI script.
